MISCELLANEOUS.

Ayer's Cherry Pectoral,

For Diseases of the Throat and Lungs,

such as Croup, Croup, Whooping

Cough, Bronchitis, Asthma,

and Consumption.

Probably never before, the whole history of

medicine has anything won so widely and so deeply

upon the confidence of mankind, as this excellent

remedy for pulmonary complaints. Through a long

series of years, and among most of the races of

man, it has risen higher and higher in their esti-

mation, as it has become better known. Its uniform

character and power to cure the most distressing

affections of the throat and lungs, have made it a re-

liable protector against them. While adapted to

all forms of disease and to young children, it is

at the same time the most effective remedy that can

be given for incipient consumption, and the most

valuable of the most obstinate of the throat and lungs. As a pro-

tection against them, it should be kept on hand in every family, and indeed as all

are sometimes subject to colds and coughs, it should

be kept on hand with this antidote for them.

Although **Consumption** is thought to be

curable, still great numbers of cases where the dis-

ease seemed settled, have been completely cured,

and the patient restored to his former health by the

Cherry Pectoral. So complete is its mastery

over the disease of the lungs and throat, that it

is the most reliable of the most effective of the

most valuable of the most obstinate of the throat and lungs. As a pro-

tection against them, it should be kept on hand in every family, and indeed as all

are sometimes subject to colds and coughs, it should

be kept on hand with this antidote for them.
